

The Gold Key

I picked up the small gold key on the ground in the forest near my house.

This little gold key made me rich...let me tell you how.

My name is Harry. I am a retired scientist and I take care of my seven year old granddaughter Susan.

I took the key home very excited to show Susan. We studied it for hours trying to find out where it came from. We found a saying on the side of the key. Susan and I read the saying out loud together "Two wishes will be granted if you can find out where I belong." POOF! We were taken to a place where all we could see were doors. The doors were all different shapes and sizes and were decorated with many designs.

As we stand there a little scared we realize that maybe this key opens one of these doors. We want to try to open the doors, however we come across a small green goblin. He also wanted to open the doors but he doesn't have a key. He realized we had a key and wanted to fight us. I stopped him by using one of my science potions to freeze him for a while so we could use the key. Susan and I started trying all of the doors we could while he was still frozen. By the 29th door we were thinking that maybe this key doesn't open any of them. Susan wanted to try one more door. She picked one that was bright pink.

I went up to the bright pink door, even though it looked like something happy was on the other side, I was still worried that something bad might be behind the door. I put the key in the lock and slowly the key turned and I was able to turn the door handle. I turned to look at the goblin and he was starting to unfreeze. We had to hurry to find out where this key belongs before he comes after us. Once inside the room, we saw in the middle of the room there was a table that had a cut-out of the exact shape of the key. I placed the gold key in the cut-out and turned it clockwise a half a turn. All of a sudden

we heard a click and the table started to shake. A box came up from the table and contained a letter that said "You have found where I belong! You may now use your two wishes." I looked at Susan and behind her was the goblin. I used my first wish to send the goblin far away. With only one wish left, I closed my eyes and wished that Susan and I would never run out of money to be able to help others. Once I opened my eyes we were back in the forest where I first found the key. We walked home and when we walked into the house and to my surprise we found bags of money all over the house.

We look at each other and immediately open the bags and through the money up in the air. Now that we have all of this money we can fix up the neighbourhood park so that all of the children can play.

I asked Susan if she wanted to go for a walk in the forest. Maybe we will find another gold key.
