

## My Key To Mars

Story written by Taha M.

I picked up the small gold key which was buried deep in the snow in my school yard. As soon as I found the key I thought there would be a treasure box somewhere near. I kept digging and digging in the snow till I found a shiny golden treasure box. I could not find a keyhole to open it with the small gold key, so I decided to take help from my teacher. I quickly ran inside my classroom with the treasure box . My teacher helped me to open the treasure box with the small gold key.

As soon as we opened the treasure box I was excited to see a black hat and a magic wand. My teacher put the hat on me and gave me the magic wand. As soon as I wore the hat I turned into a rocket ship. I made a wish to go to Mars. My classmates helped me to blast off into space by doing the countdown.

10, 9 , 8, 7, 6 , 5 ,4 ,3 ,2 ,1..... Blastoff!

When I opened my eyes I had landed on the red planet Mars. The planet Mars was a Toyland with a lot of toys everywhere. I was excited to see so many toys for me to play with. There were toy cars, toy dinosaurs, race tracks, Thomas and friends etc. I enjoyed riding my cars deep into the craters and high above on the tall mountains. I spent my day playing with the toys on Mars but as it was getting dark I started to miss my family and wanted to come back home to Earth.

I got back onto the rocket ship and blasted off again into space to reach Earth. It was nearly evening when I got back home. I was excited to see my family and hugged them tight.

The next day morning I took the hat and magic wand to school. My teacher and friends were excited to listen about my journey to Mars.

I shared my magic hat and wand with my friends. Each of them took turns to wear the hat and made their own wish.

I felt lucky and special to have found the small gold key.
